### **DETAILED ACTION**

### Status of the Claims

1. Claims 1-17 were originally filed on July 14, 2006.

The preliminary amendment to the claims received on July 14, 2006 canceled claims 1-17 and added new claims 18-71.

Claims 18-71 are currently pending and under consideration.

### Election/Restrictions

2. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 18-38, drawn to a method of identifying a translational fusion partner for secretion of a target protein.

Group II, claim(s) 39-58, drawn to a method of making a library.

Group III, claim(s) 59, drawn to a TFP library.

Group IV, claim(s) 60-61, drawn to a TFP. Please note: Group IV actually contains several subgroups which are distinct inventions (for example: Group IVA is drawn to a TFP of SEQ ID NO: 1, Group IVB is drawn to a TFP of SEQ ID NO: 3, etc.).

Group V, claim(s) 62-68, drawn to a polynucleotide. Please note: Group V actually contains several subgroups which are distinct inventions (for example: Group VA is drawn to a polynucleotide of SEQ ID NO: 2, Group VB is drawn to a polynucleotide of SEQ ID NO: 4, etc.).

Group VI, claim(s) 69-71, drawn to a method of making a target protein.

Application/Control Number: 10/586,045

Art Unit: 1639

3. The inventions listed as Groups I-VI do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the common technical feature is a TFP and the polynucleotide that encodes a TFP which is known in the prior art.

Page 3

Boquet et al. (U.S. Patent 5,362644 issued November 8, 1994) teach polynulceotides encoding fusion proteins comprising a protein fused to a reporter (please refer to the entire specification). In addition, Mascarenhas et al. (U.S. Patent 5,563,046) teach polynucleotides encoding fusion proteins comprising a protein fused to a portion of another protein to allow for secretion of the fusion protein.

4. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

# For Group I:

- a. a single, specific species of target protein (see claims 20-22),
- b. a single, specific species of source and type of polynucleotide fragments (see claims 23-27),
  - c. a single, specific species of cell (see claims 28, 29, and 38),
  - d. a single, specific species of reporter protein (see claims 30-32 and 38), and
  - e. a single, specific species of automatic screening vector (see claims 33-37).

## For Group II:

- a. a single, specific species of target protein (see claims 41-43),
- b. a single, specific species of source and type of polynucleotide fragments (see claims 44-48),
  - c. a single, specific species of cell (see claims 49-50),

Art Unit: 1639

d. a single, specific species of reporter protein (see claims 51-53), and

e. a single, specific species of automatic screening vector (see claims 54-58).

- 5. Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.
- 6. Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).
- 7. The claims are deemed to correspond to the species listed above in the following manner: see the claims indicated above with each species.
- 8. The following claim(s) are generic: for Group I, claim 18 is generic and for Group II, claim 39 is generic.
- 9. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: the species are structurally and functionally different.

Application/Control Number: 10/586,045

Page 5

Art Unit: 1639

10. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

- 11. The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.
- 12. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

## Potential Rejoinder

13. The examiner has required restriction between product and process claims. Where applicant elects claims directed to the product, and the product claims are subsequently found allowable, withdrawn process claims that depend from or otherwise require all the limitations of the allowable product claim will be considered for rejoinder. <u>All</u> claims directed to a nonelected process invention must require all the limitations of an allowable product claim for that process invention to be rejoined.

Application/Control Number: 10/586,045

Page 6

Art Unit: 1639

In the event of rejoinder, the requirement for restriction between the product claims and the rejoined process claims will be withdrawn, and the rejoined process claims will be fully examined for patentability in accordance with 37 CFR 1.104. Thus, to be allowable, the rejoined claims must meet all criteria for patentability including the requirements of 35 U.S.C. 101, 102, 103 and 112. Until all claims to the elected product are found allowable, an otherwise proper restriction requirement between product claims and process claims may be maintained.

Withdrawn process claims that are not commensurate in scope with an allowable product claim will not be rejoined. See MPEP § 821.04(b). Additionally, in order to retain the right to rejoinder in accordance with the above policy, applicant is advised that the process claims should be amended during prosecution to require the limitations of the product claims. Failure to do so may result in a loss of the right to rejoinder. Further, note that the prohibition against double patenting rejections of 35 U.S.C. 121 does not apply where the restriction requirement is withdrawn by the examiner before the patent issues. See MPEP § 804.01.

#### **Future Communications**

Any inquiry concerning this communication or earlier communications from the examiner should be directed to AMBER D. STEELE whose telephone number is (571)272-5538. The examiner can normally be reached on Monday through Friday 9:00AM-5:00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Christopher Low can be reached on 571-272-0951. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
